Subject: US vs. Microsoft

I think the Microsoft settlement is a good one for the nation. It opens up doors for other competition on the Windows platform. As a consumer I look for good value in what I purchase. If I get "extras" included in a purchase I'm ahead of the game! When I say extras I mean browsers, cdplayers, movie makers. This is GOOD for the consumer!

I've always had a choice to use competitive products on the windows platform. Sometimes I purchased these products because they where "better" than what Microsoft had to offer.

Let's just get this done with... Our country is in enough chaos. Let's beat down our real enemies. Not a company that supplies good software at low prices.
